

SMALL PC. BIG POTENTIAL.

The Lenovo ThinkCentre M720 Tiny

Where do your customers spend most of their time working? If the answer is 'at a desk', you might find that desktop PCs are the right solution for them.

Reliable, powerful and customisable they are a viable alternative to laptops or 2-in-1s, desktop PCs can offer a serious upgrade for at-home or in-office users. They don't have to be large monoliths taking up loads of spaces either. It's time to think Tiny.

LENOVO THINKCENTRE M720 TINY

Capable of giving regular desktops a run for their money, while being the size of a side plate, the ThinkCentre M720 Tiny is everything business users want from a desktop. With powerful processor options, enhanced security and exceptional cooling, it's an unobtrusive way of getting the job done.

Save space. Save energy

The ThinkCentre M720 Tiny is small enough to be stored on a bookshelf, under a desk, or even attached to the back of a compatible monitor, keeping clutter off the desk. It's also the first PC to earn Ultra Low Noise Certification from TÜV Rheinland, along with Energy Star® 7.0 and EPEAT™ Gold ratings. Combined, this tiny PC is near-silent, near-invisible and cheap to run.

Safety first

Every ThinkCentre M720 Tiny is equipped with Smart USB Protection, which allows users to restrict what USB devices can access the PC. On top of this, it also benefits from encrypted data via the Trusted Platform Module, and a Kensington Lock slot, as well as other Lenovo security features.

Small stature. Not power

Despite its small size, there's still room for some exceptionally powerful silicon inside the ThinkCentre M720 Tiny. Customers can go all the way up to a 9th generation Intel® Core™ i7-9700T, and pair it with up to 32 GB DDR4 memory.

Features:

- Windows 10 Pro 64
- Intel® UHD Graphics 630
- 2.5" and PCIe storage
- Up to Intel® Core™ i7-9700T
- Up to 32 GB RAM
- Up to three-year warranty

MADE BETTER WITH LENOVO ACCESSORIES

ThinkCentre TIO 21.5" Touch Monitor

This ThinkCentre Tiny-in-One can be the centerpiece of a modular all-in-one, free of cables and clutter. This borderless LED touchscreen delivers reliable performance at an affordable price. You can even add a Tiny PC into the back, tuck the cables through the included clip and enjoy seamless, distraction-free computing.

Lenovo Essential Wireless Keyboard and Mouse

A wire-free desk needs a wireless keyboard and mouse. This sleek and stylish combo uses a 2.4GHz connection to retain a consistent connection, while the mouse's optical sensor provides precision tracking.
